

Check Chart guidance

The check chart is for learners on phonics intervention to take into class as a way to remind them to use the spellings they have been taught. The class teacher can also see what has been taught in intervention and remind the learner.

Print double sided onto pastel or cream card.

The middle two pages can be a record of exception words the learner has been taught, or words containing phonics patterns. On the back, the learner or adult writes the graphemes as they are taught, with a word containing the grapheme next to it.
